

*Anne Charlotte Saliba focuses all her attention on light.*

### Anne-Charlotte Saliba - Paper artist & designer

She creates lamps from scratch, making them evolve and grow as she works, in her studio. Her collections are part of an eco-design approach that combines elegance, finesse, and respect for the environment.

The beauty of the outside world, and more specifically that of nature, is of real importance to the designer, as her influences come mainly from the realms of plants and animals. She takes her inspiration from the delicate lines and membranes of certain veined plants, as well as the bioluminescence and the graceful movements of abyssal species, thus giving a living character to some of her lamps.

With a degree in Applied Arts at Lisaa Rennes, specialising in interior architecture and object design, Anne Charlotte Saliba also creates custom pieces for spaces according to their stories and tales. This is why she likes to venture out for commissions. With each new light, a new story...
